

AI WEATHER WISE –8 PHASES

STRUCTURE

Project Title : AI Weather Wise

Team Leader : S. Srinidhi & srinithi22nd@gmail.com

Team Members : R. Supriya & supriyajagathi2006@gmail.com

R. Vasuki & vasukiii128@gmail.com

D.Yogeshwari & priyadevaraj1307@gmail.com

5. PROJECT DEVELOPMENT PHASE

Project Setup

- Create AI Weatherwise folder
- Open it in VS Code
- Initialize Node.js
- Install dependencies

Dependencies

```
npm install express mongoose bcryptjs jsonwebtoken cors dotenv multer  
@google/genai
```

and:

```
npm install --save-dev nodemon
```

Project Files

```
index.js  
.env  
package.json  
.gitignore
```

Environment Configuration

```
PORT=5000  
MONGO_URI=mongodb+srv://Weatherwise:Weatherwise12345@weatherwise.0clnfcn.mo  
ngodb.net/?appname=WeatherWise  
JWT_SECRET=JWT_SECRET=AIWeatherwise_2006_22222  
GEMINI_API_KEY=AQ.Ab8RN6JBuuinC74ZtMhNQCKJMRkB9j1cgz6zWJC_GMGv2XqGkw
```

Backend Development

Your backend uses:

- Node.js
- Express.js
- MongoDB
- Modular architecture
- Routes
- Controllers
- Middleware
- Models
- Utility modules
- REST APIs
- Authentication
- AI-powered content generation
- Administrative operations

Main Entry Point

`index.js`:

- Initializes Express
- Loads environment variables
- Configures middleware
- Connects MongoDB
- Registers API routes
- Starts the server
