

AI WeatherWise — 8 Phase Structure

1. Brainstorming & Ideation Phase:

From your document, include,

Project Title: AI WeatherWise – Deliver Intelligent Weather Forecasts and Insights

Background:

Alex is a travel enthusiast who frequently visits different cities and needs a streamlined way to track local weather conditions and receive AI-driven activity suggestions based on current forecasts.

Problem Identified:

Your file identifies these problems.

- Difficulty tracking and managing multiple favorite weather locations.
- Lack of personalized recommendations for outdoor activities or clothing.
- Need for natural-language weather summaries instead of raw weather metrics.
- Lack of a secure system to store and synchronize preferences across devices.

Proposed Solution:

AI WeatherWise provides a centralized service for weather-data retrieval and AI orchestration. It maintains user and location data and provides customized insights and recommendations through Google Gemini.

Expected Outcome:

The system uses centralized data management and AI to provide context-aware weather advice while maintaining data integrity through Mongoose and Gemini integration.
